Progression Maps

Number

Addition and Subtraction

Multiplication and Division

Fractions, Decimals, Percentages and Ratio

Measures

Measures - Money

Measures – Time

Geometry

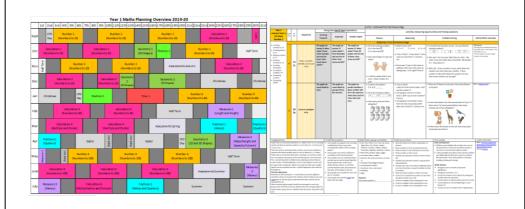

Position

Statistics

Algebra

These set out the progression through each year group in key topic areas. Each one is divided further in sub categories showing the pathway in developing understanding.

Long Term Planning and Scheme of Work

Reception

Year 1

Year 2

Year 3

Year 4

Year 5

Year 6

This details the sequencing of knowledge and concepts intended to build mathematical understanding systematically over time. This reflects a higher proportion of teaching time on 'high value' areas: number, place value and calculations.

Although the Scheme of Work details the length of time required to teach concepts, this is flexible so that gaps in pupils' mathematical knowledge can be addressed.

The Scheme of Work details additional information for teachers including;

- Pedagogical support
- Common misconceptions
- Mathematical language and notation
- Possible success criteria
- · Prior learning required

Teachers plan from the Scheme of Work onto the short term planning template and use other materials to supplement this.

Connections Questions (Using Misconceptions) etry Position Measures Fractions Time Foreign linguage - Opin by - Country of - Use energing - September - Septembe

Year 1

Reception

Shorter Term Planning Templates

Year 2

Year 3

Year 4

Year 5

Year 6

The short term allows teachers to focus on the following areas when planning a sequence of learning:

- Clearly articulated content objectives
- Fluency, reasoning, problem solving objectives (separate document which details these)
- Number of days dedicated to a sequence of learning (including sequential small steps)
- Linking learning to prior knowledge and making connections to other learning
- Representation and structure (CPA)
- Misconceptions
- Assessment opportunities, including diagnostic questions (from diagnostic questions.com)
- Vocabulary and using correct mathematical language
- Support and challenge for all (i.e. differentiation)
- Retrieval Practice (re-visiting topics) for recall of key skills

East Midlands Academy Trust Maths Skill Progress Map – Number

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Count to and across 100, forwards and backwards, beginning with 0 or 1, or from		Continue to count in ones, tens and hundreds, so that they become fluent in the order and place value of numbers to 1000. 9Non-Statutory Guidance)	Count backwards through 0 to include negative numbers Counting in tens and hundreds, maintain fluency in other multiples through varied and frequent practice. (Non-Statutory Guidance)	Interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through 0	Use negative numbers in context, and calculate intervals across 0
Place Value:	any given number Given a number, identify 1 more and 1 less		Find 10 or 100 more or less than a given number	Find 1,000 more or less than a given number		
Counting	Count in multiples of 2s and 5s	Count in steps of 2, 3, and 5 from 0, and in 10s from any number, forward and backward	Count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number	Count in multiples of 6, 7, 9, 25 and 1,000 (From Calculations)	Count forwards or backwards in steps of powers of 10 for any given number up to 1,000,000	
	Count in multiples of three to support their later understanding of a third (non-Statutory Guidance) Count up and down in tenths (From Fractions) Count up and down in hundredths (From Fractions)		Count up and down in hundredths (From Fractions)	Recognise and describe linear number sequences (for example, 3, 3u1/2, 4, 4u1/2), including those involving fractions and decimals, and find the term-to-term rule in words (for example, add 1/2). (Non-Statutory Guidance)		
Comparing	Use the language of: equal to, more than, less than (fewer), most, least	Compare and order numbers from 0 up to 100; use <, > and = signs	Compare and order numbers up to 1,000	Order and compare numbers beyond 1,000	order and compare numbers to at least 1,000,000.	order and compare numbers up to 10,000,000
Numbers	,			Compare numbers with the same number of decimal places up to 2 decimal places (Fractions Unit)	Read, write, order and compare numbers with up to 3 decimal places	
Identifying, representing and estimating	Identify and represent numbers using objects and pictorial representations including the number line	Identify, represent and estimate numbers using different representations, including the number line	Identify, represent and estimate numbers using different representations	Identify, represent and estimate numbers using different representations Using a variety of representations, including measures, pupils become fluent in the order and place value of numbers beyond 1000 (Non-Statutory Guidance)		Use the whole number system, including saying, reading and writing numbers accurately. (Non-Statutory Guidance)
Reading and Writing	Count, read and write numbers to 20 in numerals and words	Read and write numbers to at least 100 in numerals and in words	Read and write numbers up to 1,000 in numerals and in words		Read and write numbers to at least 1,000,000.	Read and write numbers up to 10,000,000
Roman			Tell and write the time from an analogue clock, including using 12-hour clocks, 24- hour clocks and using Roman Numerals from	Read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of 0 and place value	Read Roman numerals to 1,000 (M) and recognise years written in Roman numerals	
Numerals			I to XII (From Time Unit)	Roman numerals should be put in their historical context so pupils understand that there have been different ways to write whole numbers and that the important concepts of zero and place value were introduced over a period of time. (Non-Statutory Guidance)		
	Begin to recognise place value in numbers beyond 20 by reading, writing, counting and comparing	Recognise the place value of each digit in a two-digit number (10s, 1s)	Recognise the place value of each digit in a 3-digit number (100s, 10s, 1s)	Recognise the place value of each digit in a four-digit number (1,000s, 100s, 10s, and 1s)	Determine the value of each digit in numbers up to 1,000,000	Determine the value of each digit in numbers up to 10,000,000
Understanding Place Value	numbers up to 100, supported by objects and pictorial representations. (Non-Statutory Guidance)	Partition numbers in different ways (for example, 23 = 20 + 3 and 23 = 10 + 13). (Non-Statutory Guidance)	recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10	recognise that hundredths arise when dividing an object by 100 and dividing tenths by 10	Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents	Identify the value of each digit in numbers given to 3 decimal places
riace value		Begin to understand zero as a place holder. (Non-Statutory Guidance)	Use larger numbers to at least 1000, applying partitioning related to place value using varied and increasingly complex problems, (for example, 146 = 100 + 40 and 6, 146 = 130 + 16). (Non-Statutory Guidance)	Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths (From Fractions)	Multiply and divide whole numbers and those involving decimals by 10, 100 and 1,000	multiply and divide numbers by 10, 100 and 1,000 giving answers up to 3 decimal places (Fractions)
December				Round any number to the nearest 10, 100 or 1,000	Round any number up to 1,000,000 to the nearest 10, 100, 1,000, 10,000 and 100,000	Round any whole number to a required degree of accuracy
Rounding				Round decimals with 1 decimal place to the nearest whole number (From Fractions)	Round decimals with 2 decimal places to the nearest whole number and to 1 decimal place	
Properties of				Connect estimation and rounding numbers to the use of measuring instruments (Non-Statutory Guidance) Recognise and use factor pairs and commutativity in mental	Identify multiples and factors, including finding all factor	Identify common factors, common
Number:				calculations	pairs of a number, and common factors of 2 numbers Know and use the vocabulary of prime numbers, prime	multiples and prime numbers
Factors, multiples,					factors and composite (non-prime) numbers Establish whether a number up to 100 is prime and recall	
Primes, Square and Cube Numbers					prime numbers up to 19 Recognise and use square numbers and cube numbers, and the notation for squared (²) and cubed (³)	
Problem Solving		Use place value and number facts to solve problems		Solve number and practical problems that involve all of the above and with increasingly large positive numbers	Solve number problems and practical problems that involve all of the above	Solve number and practical problems that involve all of the above

East Midlands Academy Trust Maths Skill Progress Map – Addition and Subtraction

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Number Bonds	Represent and use number bonds and related subtraction facts within 20 Memorise and reason with number bonds to 10 and 20 in several forms (for example, $9 + 7 = 16$; $16 - 7 = 9$; $7 = 16 - 9$). (Non-Statutory Guidance)	Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100				
Mental	Add and subtract one-digit numbers to 20, including 0 Combine and increase numbers, counting forwards and backwards (Non-Statutory Guidance)	Add and subtract numbers using concrete objects, pictorial representations, and mentally, including • adding 3 one-digit numbers, • a two-digit number and 1s, • a two-digit number and 10s • 2 two-digit numbers	Add and subtract numbers mentally, including • a three-digit number and 1s, • a three-digit number and 10s, • a three-digit number and 100s		Add and subtract numbers mentally with increasingly large numbers	Perform mental calculations, including with mixed operations and large numbers
calculation	Read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs Realise the effect of adding or subtracting zero. (Non-Statutory Guidance)	Show that addition of 2 numbers can be done in any order (commutative) and subtraction of 1 number from another cannot Practise addition and subtraction to 20 to become increasingly fluent in deriving facts such as using $3 + 7 = 10$; $10 - 7 = 3$ and $7 = 10 - 3$ to calculate $30 + 70 = 100$; $100 - 70 = 30$ and $70 = 100 - 30$. (Non-Statutory Guidance)	Practise solving varied addition and subtraction questions. For mental calculations with two-digit numbers, the answers could exceed 100. (Non-Statutory Guidance)	Continue to practise both mental methods and written methods addition and subtraction with increasingly large numbers to aid fluency. (Non-Statutory Guidance)	Practise mental calculations with increasingly large numbers to aid fluency (for example, 12 462 – 2300 = 10 162). (Non-Statutory Guidance)	Use their knowledge of the order of operations to carry out calculations involving the 4 operations
Written Methods	Read, write and interpret mathematical statements involving addition (+), subtraction (–) and equals (=) signs	Add and subtract numbers using concrete objects, pictorial representations, and mentally, including • adding 3 one-digit numbers, • a two-digit number and 1s, • a two-digit number and 10s • 2 two-digit numbers	Add and subtract numbers with up to 3 digits, using a variety of methods Add and subtract amounts of money to give change, using both £ and p in practical contexts (From Measures – Money)	Add and subtract numbers with up to 4 digits using a variety of methods	Add and subtract whole numbers with more than 4 digits using a range of methods and a Concrete/Pictorial/Abstract approach	
Inverse Operations, Estimating and Checking Answers	Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $3 = ? - 7$	Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems Check calculations, including by adding to check subtraction and adding numbers in a different order to check addition (for example, 5 + 2 + 1 = 1 + 5 + 2 = 1 + 2 + 5). This establishes commutativity and associativity of addition. (Non-Statutory Guidance)	Estimate the answer to a calculation and use inverse operations to check answers	Estimate and use inverse operations to check answers to a calculation	Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy.	Use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy. Explore the order of operations using brackets; for example, 2 + 1 x 3 = 5 and (2 + 1) x 3 = 9. (Non-Statutory Guidance)
	Discuss and solve problems in familiar practical contexts, including using quantities. Problems should include the terms: put together, add, altogether, total, take away, distance between, difference between, more than and less than, so that pupils develop the concept of addition and	Solve problems with addition and subtraction using concrete objects and pictorial representations, including those involving numbers, quantities and measures	Solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction	Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why	Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why
Problem Solving	subtraction and are enabled to use these operations flexibly. (Non-Statutory Guidance)	Solve problems with addition and subtraction applying their increasing knowledge of mental and written methods				Solve problems involving similar shapes where the scale factor is known or can be found (From FDP)
		Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change (From Measures – Money)	eserves to be the best t			Round answers to a specified degree of accuracy, for example, to the nearest 10, 20, 50 etc., but not to a specified number of significant figures. (Non-Statutory Guidance)

Every child deserves to be the best they can be

East Midlands Academy Trust Maths Skill Progress Map – Multiplication and Division

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Multiplication and Division	Count in multiples of 2s, 5s and 10s	10s from any number, forward and backward (From Number)	Count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number (From number)	Count in multiples of 6, 7, 9, 25 and 1,000	Count forwards or backwards in steps of powers of 10 for any given number up to 1,000,000 (From Number)	
Facts		Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers	Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables	Recall multiplication and division facts for multiplication tables up to 12 × 12		
	Make connections between arrays, number patterns, and counting in patterns, and counting in patterns. Make connections Pupils are introduced to the multiplication tables. They practise to become fluent in the 2, 5 and 10 multiplication tables and connect them to each other. They connect the 10 multiplication table to		They practise to become fluent in the 2, 5 and 10 multiplication tables and connect them to each other. They cannot the 10 multiplication table to		Multiply and divide numbers mentally, drawing upon known facts	Perform mental calculations, including with mixed operations and large numbers
Mental	twos, fives and tens (Non-Statutory Guidance)	place value, and the 5 multiplication table to the divisions on the clock face. They begin to use other multiplication tables and recall multiplication facts, including using related division facts to perform	Develop efficient mental methods, for example, using commutativity and associativity (for example, $4 \times 12 \times 5 = 4 \times 5 \times 12 = 20 \times 12 = 240$) and multiplication and division facts (for example, using $3 \times 2 = 6$, $6 \div 3 = 2$ and $2 = 6 \div 3$) to derive related facts (for example,	Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together 3 numbers	Multiply and divide whole numbers and those involving decimals by 10, 100 and 1,000 (From Number – Understanding Place Value)	Associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375] for a simple fraction [for example, 3/8] (From Fractions)
Calculation	written and mental calculations (No		$30 \times 2 = 60, 60 \div 3 = 20$ and $20 = 60 \div 3$). (Non-	Practise mental methods and extend this to three- digit numbers to derive facts, (for example $600 \div 3 =$ 200 can be derived from 2 x 3 = 6). (Non-Statutory Guidance)	Understand the terms factor, multiple and prime, square and cube numbers and use them to construct equivalence statements (for example, $4 \times 35 = 2 \times 2 \times 35$; $3 \times 270 = 3 \times 3 \times 9 \times 10 = 92 \times 10$). (Non-Statutory Guidance)	Explore the order of operations using brackets, for example, $2 + 1 \times 3 = 5$ and $(2 + 1) \times 3 = 9$. (Non-Statutory Guidance)
		Show that multiplication of 2 numbers can be done in any order (commutative) and division of 1 number by another cannot	Show that multiplication of 2 numbers can be done in any order (commutative) and division of 1 number by another cannot	Recognise and use factor pairs and commutativity in mental calculations (Also in Number Properties)	Distributivity can be expressed as $a(b + c) = ab + ac$. (Non-Statutory Guidance)	Use their knowledge of the order of operations to carry out calculations involving the 4 operations
and sharing quantities	Through grouping and sharing small quantities, begin to understand:	Calculate mathematical statements for multiplication and division within the multiplication tables and write them using	Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including	Multiply two-digit and three-digit numbers by a one-digit number using a variety of methods	Multiply numbers up to 4 digits by a one- or two-digit number using a range of methods	Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication
	multiplication and division; doubling numbers and	the multiplication (x), division (÷) and equals (=) signs	for two-digit numbers times one-digit numbers, using mental and a variety of written methods			Multiply one-digit numbers with up to 2 decimal places by whole numbers
Written Calculation	quantities; and finding simple fractions of objects, numbers and quantities. (Non-	Pupils work with a range of materials and contexts in which multiplication and division relate to grouping and sharing discrete and continuous quantities, to arrays and to repeated addition. They begin to relate these to fractions and measures (for example, $40 \div 2 = 20$, 20 is a half of 40). They use		Write statements about the equality of expressions (for example, use the distributive law $39 \times 7 = 30 \times 7 + 9 \times 7$ and associative law $(2 \times 3) \times 4 = 2 \times (3 \times 4)$). They combine their knowledge of number facts and rules of arithmetic to solve mental and written calculations for example, $2 \times 6 \times 5 = 10 \times 6 = 60$.	Divide numbers up to 4 digits by a one-digit number using a range of methods and interpret remainders appropriately for the context	Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context
	Statutory Guidance)	commutativity and inverse relations to develop multiplicative reasoning (for example, $4 \times 5 = 20$ and $20 \div 5 = 4$). (Non-Statutory Guidance)		(Non-Statutory Guidance)	Interpret non-integer answers to division by expressing results in different ways according to the context, including with remainders, as fractions, as decimals or by rounding (for example, $98 \div 4 = 98/4 = 24 \text{ r2} = 24u1/2 = 24.5 \approx 25$) (Non-Statutory Guidance)	Divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context Use written division methods in cases where the
						has up to 2 decimal places
	Solve one-step problems involving multiplication and division, by	Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts	Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts	Solve problems involving multiplying and adding, including using the distributive law to multiply two-digit numbers by 1 digit, integer scaling problems and harder correspondence problems such as n objects are connected to	Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign	Solve problems involving addition, subtraction, multiplication and division
	calculating the answer using		Solve problems, including missing number problems, involving multiplication and division,	m objects	Solve problems involving number up to 3 decimal places	
Problem Solving	concrete objects, pictorial representations		including positive integer scaling problems and correspondence problems in which n objects are connected to m objects		Use all four operations to solve problems involving measure [money] using decimal notation, including scaling (From Measures)	
Solving	and arrays with the support of the teacher		the four operations to use and why. These include measuring and scaling contexts, (for example, four times as high, eight times as long etc.) and correspondence problems in which m objects are	Solve two-step problems in contexts, choosing the appropriate operation, working with increasingly harder numbers. This should include correspondence questions such as the numbers of choices of a meal on a menu, or three cakes shared equally between 10 children.(Non-Statutory Guidance)	Solve problems involving multiplication and division, including using their knowledge of factors and multiples, squares and cubes (From Number)	Round answers to a specified degree of accuracy, for example, to the nearest 10, 20, 50 etc., but not to a specified number of significant figures. (Non-Statutory Guidance)

East Midlands Academy Trust Maths Skill Progress Map – Fractions, Decimals, Percentages and Ratio

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Counting and Sequences		Count in fractions up to 10, starting from any number and using the 1/2 and 2/4 equivalence on the number line (Non-Statutory Guidance)	Count up and down in tenths Connect tenths to place value, decimal measures and to division by 10. (Non-Statutory Guidance)	Count up and down in hundredths Practise counting using simple fractions and decimals, both forwards and backwards. (Non-Statutory Guidance)	Continue to practise counting forwards and backwards in simple fractions. Extend counting from year 4, using decimals and fractions including bridging zero, for example on a number line (Non-Statutory Guidance)	Generate and describe linear number sequences (with fractions) (From Algebra)
	Recognise, find and name a half as 1 of 2 equal parts of an object, shape or quantity	Recognise, find, name and write fractions 1/3, 1/4, 2/4 and 3/4 of a length, shape, set of objects or quantity	Recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators Recognise fractions in the context of parts of a whole, numbers, measurements, a shape, and unit fractions as a division of a quantity. (Non-Statutory Guidance)	Recognise and show, using diagrams, families of common equivalent fractions Extend the use of the number line to connect fractions, numbers and measures. (Non-Statutory Guidance) Connect hundredths to tenths and place value and decimal measure (Non-Statutory Guidance)	Recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example, $2/5 + 4/5 = 6/5 = 1 \ 1/5$]	Use a variety of images to support their understanding of multiplication with fractions. This follows earlier work about fractions as operators (fractions of), as numbers, and as equal parts of objects, for example as parts of a rectangle. (Non-Statutory Guidance)
and name a quarter as 1 o	and name a quarter as 1 of 4 equal parts of	Use fractions as 'fractions of' discrete and continuous quantities by solving problems using shapes, objects and quantities. Connect unit fractions to equal sharing and grouping, to numbers when they can be calculated, and to measures, finding	Recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10	recognise that hundredths arise when dividing an object by 100 and dividing tenths by 10	Recognise the per cent symbol (%) and understand that per	
	shape or	fractions of lengths, quantities, sets of objects or shapes. (Non-Statutory Guidance)	Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators	Understand the relation between non-unit fractions and multiplication and division of quantities, with particular emphasis on tenths and hundredths. (Non-Statutory Guidance)	cent relates to 'number of parts per 100', and write percentages as a fraction with denominator 100, and as a decimal fraction	
Comparing and Ordering			Compare and order unit fractions, and fractions with the same denominators	Compare numbers with the same number of decimal places up to 2 decimal places	Compare and order fractions whose denominators are all multiples of the same number	Compare and order fractions, including fractions >1
	Connect halves and quarters to the equal sharing and grouping of sets of	Recognise the equivalence of 2/4 and 1/2	Recognise and show, using diagrams, equivalent fractions with small denominators	Recognise and write decimal equivalents of any number of tenths or hundreds	Read and write decimal numbers as fractions [for example, 0.71 = 71/100]	Use common factors to simplify fractions; use common multiples to express fractions in the same denomination
Equivalence	objects and to measures, as well as recognising and combining halves and quarters as parts of a whole. (Non-Statutory Guidance)	Meet 3/4 as the first example of a non- unit fraction. (Non-Statutory Guidance)	Begin to understand unit and non-unit fractions as numbers on the number line, and deduce relations between them, such as size and equivalence. They should go beyond the [0, 1] interval, including relating this to measure. (Non-Statutory Guidance)	Recognise and write decimal equivalents to $1/4$, $1/2$, $3/4$ Make connections between fractions of a length, of a shape and as a representation of one whole or set of quantities. Pupils use factors and multiples to recognise equivalent fractions and simplify where appropriate (for example, $6/9 = 2/3$ or $1/4 = 2/4$). (Non-Statutory Guidance)	Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths Solve problems which require knowing percentage and decimal equivalents of 1/2, 1/4, 1/5, 2/5, 4/5 and those fractions with a denominator of a multiple of 10 or 25 Make connections between percentages, fractions and decimals (for example, 100% represents a whole quantity and 1% is 1/100, 50% is 50/100, 25% is 25/100) and relate this to finding 'fractions of'. (Non-Statutory Guidance)	Recall and use equivalences between simple fractions, decimals and percentages, including in different contexts Associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375] for a simple fraction [for example, 3/8]
		Write simple fractions, for example 1/2 of 6 = 3	Add and subtract fractions with the same denominator within one whole [for example, 5/7 + 1/7 = 6/7] Understand the relation between unit	Add and subtract fractions with the same denominator Find the effect of dividing a one- or two-digit	Add and subtract fractions with the same denominator, and denominators that are multiples of the same number Multiply proper fractions and mixed numbers by whole numbers,	Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions Multiply simple pairs of proper fractions, writing the answer in its
Calculating			fractions as operators (fractions of), and division by integers. (Non-Statutory Guidance)	number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths (From Fractions)	supported by materials and diagrams Connect multiplication by a fraction to using fractions as operators (fractions of), and to division, building on work from previous years. This relates to scaling by simple fractions, including fractions > 1. (Non-Statutory Guidance)	simplest form [for example, $1/4 \times 1/2 = 1/8$] Divide proper fractions by whole numbers [for example, $1/3 \div 2 = 1/6$]
				Round decimals with 1 decimal place to the nearest whole number	Round decimals with 2 decimal places to the nearest whole number and to 1 decimal place (Also in Number)	Round any whole number to a required degree of accuracy (Also in Number)
Problem Solving and Ratio			Solve problems that involve the above	Solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number	Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates	Solve problems - involving the calculation of percentages [for example, of measures and such as 15% of 360] and the use of percentages for comparison

	with the same deno variety of increasing	subtracting fractions minator through a involving fractions and decimals to two places (From Measures) Solve simple measure and money proble involving fractions and decimals to two places (From Measures)

East Midlands Academy Trust Maths Skill Progress Map – Measures

		Year 1		Year 2	Υ	ear 3	Year 4	Year 5	Year 6
	describe	lengths and heights [for example, long/short, longer/shorter, tall/short, double/half]		lengths		(m/cm/mm)	Estimate and compare different measures	Compare the area of rectangles (including squares), including using standard units, square centimetres (cm²) and square metres (m²), and estimate the area of irregular shapes	
Comparing	practical problems for	mass/weight [for example, heavy/light, heavier than, lighter than]	Compare and order	mass	Compare	mass (kg/g)			
and Estimating		capacity/volume [for example, full/empty, more than, less than, half, half full, quarter]	and record the results using >, <	volume/capacity		capacity (I/mI)	c	Estimate volume [for example, using 1 cm³ blocks to build cuboids (including cubes)] and capacity [for example, using water]	Estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm³) and cubic metres (m³), and extending to other units [for example, mm³ and km³]
			and =	temperature	The comparison of measures includes simple scaling by integers (for example, a given quantity or measure is twice as long or five times as high) and this connects to multiplication. (Non-Statutory Guidance)				
	Measure and	lengths and heights	Choose and	length/height in any direction (m/cm) to the nearest appropriate unit, using rulers.		lengths (m/cm/mm)	Calculate different measures	Calculate the area from scale drawings using given measurements.(Non-Statutory Guidance)	Use, add and subtract positive and negative integers for measures such as temperature.(Non-Statutory Guidance)
begin	begin to record	mass and weight	use appropriate standard	mass (kg/g) to the nearest appropriate unit, using scales.	Measure, add rand subtract	mass (kg/g)			
Calculating		capacity and volume	units to estimate and	capacity (litres/ml) to the nearest appropriate unit, using measuring vessels		capacity (I/mI)			
	measures, p such as a ru	order to become familiar with standard easures, pupils begin to use measuring tools that as a ruler, weighing scales and entainers.(Non-Statutory Guidance)		measure temperature (°C); to the nearest appropriate unit, using thermometers		sure using the s and units. (Non- nce)			
	of quantities units, includ and continu	using and comparing different types s and measures using non-standard ling discrete (for example, counting) ous (for example, liquid)	andard increasing accuracy, using their knowledge		Progress to using a wider range of measures, including comparing and using mixed units (for example, 1 kg and 200g) and simple equivalents of mixed		Convert between different units of measure [for example, kilometre to metre; hour to minute]	Convert between different units of metric measure [for example, kilometre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre]	Use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to 3 decimal places
Conversion		nt, to using manageable common its. (Non-Statutory Guidance)	Guidance)	eviations. (Non-Statutory	units (for examp		Use multiplication to convert from larger to smaller units. (Non-Statutory Guidance)	Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints	Convert between miles and kilometres Connect conversion (for example, from kilometres to miles) to a graphical representation as preparation for understanding linear/proportional graphs. (Non-Statutory Guidance)
Solving Problems	addition ar	step problems that involve and subtraction, using concrete d pictorial representations, and amber problems such as 23 = ? – 4 culations)			number proble facts, place val	ems, using number	Solve simple measure and money problems involving fractions and decimals to 2 decimal places	Use all four operations to solve problems involving measure [length, mass, volume, money] using decimal notation, including scaling	Solve problems involving the calculation and conversion of units of
Perimeter, Area and Volume					Measure the p D shapes	·	Measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres	Measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres Use the properties of rectangles to deduce related facts and find	Recognise that shapes with the same areas can have different perimeters and vice versa
Volume					L		unu medes	missing lengths and angles (Also in Geometry)	

Perimeter can be expressed Calculate the perimeter of rectangles and related composite shapes, Relate the area of rectangles to parallelograms and triangles, for example, algebraically as 2(a + b) where a and b including using the relations of perimeter or area to find unknown by dissection, and calculate their areas, understanding and using the are the dimensions in the same unit. lengths. Missing measures questions such as these can be expressed formulae (in words or symbols) to do this. (non-Statutory Guidance) (Non-Statutory Guidance) algebraically, for example 4 + 2b = 20 for a rectangle of sides 2 cm and b cm and perimeter of 20cm. (Non-Statutory Guidance) Find the area of rectilinear shapes Calculate the area of parallelograms and triangles Calculate and compare the area of rectangles (including squares), including using standard units, square centimetres by counting squares (cm²) and square metres (m²), and estimate the area of irregular Relate area to arrays and Recognise when it is possible to use formulae for area and volume multiplication (Non-Statutory Guidance) Estimate volume [for example, using 1 cm³ blocks to build Calculate the volume of cubes and cuboids using standard units, cuboids (including cubes)] and capacity [for example, using including cubic centimetres (cm³) and cubic metres (m³), and extending to other units [for example, mm³ and km³]

Every child deserves to be the best they can be

East Midlands Academy Trust Maths Skill Progress Map – Measures (Money)

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Recognise and know the value of different denominations of coins and notes	Recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value	Add and subtract amounts of money to give change, using both \pounds and p in practical contexts (Also in Calculations)	Estimate, compare and calculate different measures, including money in pounds and pence		
Money		Find different combinations of coins that equal the same amounts of money				
iviolicy		Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change				
		Become fluent in counting and recognising coins. They read and say amounts of money confidently and use the symbols £ and p accurately, recording pounds and pence separately. (Non-Statutory Guidance)	Become fluent in recognising the value of coins, by adding and subtracting amounts, including mixed units, and giving change using manageable amounts. They record £ and p separately. The decimal recording of money is introduced formally in year 4. (Non-Statutory Guidance)			

Every child deserves to be the best they can be

East Midlands Academy Trust Maths Skill Progress Map – Measures (Time)

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Sequence events in chronological order using language [for example, before and after, next, first, today, yesterday, tomorrow,		Compare durations of events [for example, to calculate the time taken by particular events or tasks]			
and	morning, afternoon and evening] Recognise and use language relating to dates, including days of the week, weeks, months and years					
	Compare, describe and solve practical problems for time [for example, quicker, slower, earlier, later]					

Measure and Estimate	Measure and begin to record time (hours, minutes, seconds)		Estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, am/pm, morning, afternoon, noon and midnight		Use all four operations in problems involving time and money, including conversions (for example, days to weeks, expressing the answer as weeks and days). (Non-Statutory Guidance)	
Telling the Time		Tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times	Tell and write the time from an analogue clock, including using 12-hour clocks, 24-hour clocks and using Roman Numerals from I to XII	Read, write and convert time between analogue and digital 12-hour and 24-hour clocks	Complete, read and interpret information in tables, including timetables	
Time		and recording it. (Non-Statutory Guidance)	Use both analogue and digital 12-hour clocks and record their times. In this way they become fluent in and prepared for using digital 24-hour clocks in year 4. (Non-Statutory Guidance)			
Conversion		Know the number of minutes in an hour and the number of hours in a day	Know the number of seconds in a minute and the number of days in each month, year and leap year	Solve problems involving converting from hours to minutes, minutes to seconds, years to months, weeks to days	Solve problems involving converting between units of time	
		Every ch	ild deserves to be the best they	y can be		

East Midlands Academy Trust Maths Skill Progress Map – Geometry

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Recognise and name 2-D shapes [for example, rectangles (including squares), circles and triangles]	Identify and describe the properties of 2-D shapes, including the number of sides, and line symmetry in a vertical line		Identify lines of symmetry in 2-D shapes presented in different orientations		Illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius
Identifying				Draw symmetric patterns using a variety of media to become familiar with different orientations of lines of symmetry; and recognise line symmetry in a variety of diagrams, including where the line of symmetry does not dissect the original shape. (Non-Statutory Guidance)		Relationships might be expressed algebraically for example, d = 2 × r. (Non-Statutory Guidance)
Shapes and their	Recognise and name 3-D shapes [for example, cuboids (including cubes), pyramids and spheres]	Identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces			Identify 3-D shapes, including cubes and other cuboids, from 2-D representations	Describe simple 3-D shapes
Properties		Identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]			Use the properties of rectangles to deduce related facts and find missing lengths and angles (From Measures)	
	Handle common 2-D and 3-D shapes, naming these and related everyday objects fluently. (Non-Statutory Guidance)	D and 3-D shapes including: quadrilaterals and polygons, and cuboids, prisms and cones, and identify the properties of each shape (for example, number of sides, number of faces). Identify, compare and sort shapes on the basis of their properties and use vocabulary precisely, such as sides, edges, vertices and faces. Read and write names for shapes that are appropriate for their word reading and spelling. (Non-Statutory Guidance)	Knowledge of the properties of shapes is extended at this stage to symmetrical and non-symmetrical polygons and polyhedra. Pupils extend their use of the properties of shapes. They should be able to describe the properties of 2-D and 3-D shapes using accurate language, including lengths of lines and acute and obtuse for angles greater or lesser than a right angle. (Non-Statutory Guidance)	Continue to classify shapes using geometrical properties, extending to classifying different triangles (for example, isosceles, equilateral, scalene) and quadrilaterals (for example, parallelogram, rhombus, trapezium). (Non-Statutory Guidance)	Use the term diagonal and make conjectures about the angles formed between sides, and between diagonals and parallel sides, and other properties of quadrilaterals, for example using dynamic geometry ICT tools. (Non-Statutory Guidance)	Describe the properties of shapes and explain how unknown angles and lengths can be derived from known measurements.(Non-Statutory Guidance)
		(non-Statutory Guidance)	Draw 2-D shapes	Complete a simple symmetric figure with respect to a specific line of		Draw 2-D shapes using given dimensions and angles
Drawing and Construction			Connect decimals and rounding to drawing and measuring straight lines in centimetres, in a variety of contexts. (Non-Statutory Guidance)	symmetry (From Position)	conventional markings for parallel lines and right angles. (Non- Statutory Guidance)	Draw shapes and nets accurately, using measuring tools and conventional markings and labels for lines and angles. (Non-Statutory Guidance)
			Make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them			Recognise and build simple 3-D shapes, including making nets

Comparing and Classifying	Recognise these shapes in different orientations and sizes, and know that rectangles, triangles, cuboids and pyramids are not always similar to each other. (Non-Statutory Guidance)	Compare and sort common	2-D shapes and everyday objects 3-D shapes and everyday objects		Compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes	Distinguish between regular and irregular polygons based on reasoning about equal sides and angles (Copied from Identifying Shapes and their Properties)	Compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons
				Recognise angles as a property of shape or a description of a turn	Identify acute and obtuse angles and compare and order angles up to 2 right angles by size	Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles	Recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles
Angles				Identify right angles, recognise that 2 right angles make a half-turn, 3 make three-quarters of a turn and 4 a complete turn; identify whether angles are greater than or less than a right angle			Relationships might be expressed algebraically for example; a = 180 – (b + c).(Non-Statutory Guidance)
				Every child deserves to	be the best they can b	e	

East Midlands Academy Trust Maths Skill Progress Map – Position

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Pattern	Recognise and create repeating patterns with objects and with shapes (Non- Statutory Guidance)	Order and arrange combinations of mathematical objects in patterns and sequences Work with patterns of shapes, including those in different orientations (Non-Statutory Guidance)				
Position,	Describe position, direction and movement, including whole, half, quarter and three-quarter turns	Use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anticlockwise)		Complete a simple symmetric figure with respect to a specific line of symmetry Describe positions on a 2-D grid as coordinates in the first quadrant Describe movements between positions as translations of a given unit to the left/right and up/down Plot specified points and draw sides to complete a given polygon	Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed	Describe positions on the full coordinate grid (all 4 quadrants) Draw and translate simple shapes on the coordinate plane, and reflect them in the axes
Direction and Movement		Use the concept and language of angles to describe 'turn' by applying rotations, including in practical contexts (for example, pupils themselves moving in turns, giving instructions to other pupils to do so, and programming robots using instructions given in right angles). (Non-Statutory Guidance)		Draw a pair of axes in one quadrant, with equal scales and integer labels. They read, write and use pairs of	Recognise and use reflection and translation in a variety of diagrams, including continuing to use a 2-D grid and coordinates in the first quadrant. Reflection should be in lines that are parallel to the axes. (Non-Statutory Guidance)	Draw and label a pair of axes in all four quadrants with equal scaling. This extends their knowledge of one quadrant to all four quadrants, including the use of negative numbers. (Non-Statutory Guidance) Draw and label rectangles (including squares), parallelograms and rhombuses, specified by coordinates in the four quadrants, predicting missing coordinates using the properties of shapes. These might be expressed algebraically for example, translating vertex (a, b) to $(a - 2, b + 3)$; (a, b) and $(a + d, b + d)$ being opposite vertices of a square of side d . (Non-Statutory Guidance)
			Every cl	nild deserves to be the best they	can be
